Better living with Kronostep Narrow

Kronostep Narrow is an extremely promising new product line. All the floors in this series stand out by virtue of their individual character and excellent quality.

The elegant, slim-line width of only 123 mm is ideally matched to the length of 1285 mm. In addition, an all-round micro joint along the ends and sides make Kronostep Narrow a true eye-catcher. It is a product extremely rich in diversity. The exclusive appearance of the flooring is enhanced by the lustrous colours of the tropical woods, a refined exotic surface with rich, dark natural hues and above all an elegant installation pattern. It's no wonder that Kronostep Narrow is hardly distinguishable from a genuine wood floor. It represents a perfect combination of contemporary production technology and traditional craftsmanship.

Decor featured: 8729 African Walnut

Flooring for top demands – HPL Floorever high-pressure laminate flooring with S.A.S.+ enhances the value of any living space.

This laminate flooring comes with a 20-year guarantee, is extremely resilient and retains its beauty for a very long time. Floorever from Kronoflooring sets new standards in the premium segment in terms of customer benefit. The floor is supplied with a lifelong anti-static guarantee. The special multilayer HPL coating deals effortlessly with even the hardest knocks. Thanks to S.A.S.+ – the innovative combination of ultra-thin S.A.S. reflected sound absorption coating with a 3 mm noise-reducing fibreboard – Floorever is the quietest laminate flooring in the world. And in terms of looks, the highly attractive range of decors leaves nothing to be desired.
