

Press Information Domotex 2007

The Krono Original collection 2007 is a kaleidoscope of ideas inspired by nature.

With Kronoflooring's new decors, nature is very much the order of the day. That includes highlighting details to underscore the multiple facets of laminate flooring. Krono Original decors are marked by rich colouring and unique brilliance. This high-quality appearance is created by faithfully imitating the looks of genuine wood.

Krono Original design trends

Decor featured : 8766 Wenge Kyoto

Three design trends denote the new Krono Original collection:

first, the classic European woods such as oak, cherry and walnut; second, the heartwood and tropical woods with the emphasis on dark species such as wenge, jatoba, merbau and rosewood, as well as tigerwood with its warm hues; and third, the new trend towards white washed woods – Wenge Kyoto, Merinos Oak and White Washed Ash. Flooring is given a natural, highly appealing look and rich colour tones – whether bright or dark – have been highlighted.

Surface texture is harmoniously matched to the decor. The latest press technologies used create visually outstanding results.

In the production of Kronoflooring, particularly high-grade materials are processed in several steps into exclusive Krono Original floors, including the highlights of the successful Castello Stoneline collection such as Metallic Slate and Metallic Copper.

Each Krono Original floor is just as unique and unmistakable as a genuine wood floor and gives your home a signature ambience.

With Krono Original flooring, you can choose from over 100 different wood decors. From light maple through tropic jatoba to dark wenge, from floorboard effects through lively country decors to three-dimensional stone and tile decors, there's something to suit every taste.

Finishes:

Authentic Embossed Finish

Exotic Finish
